

**(57) Abstract:** An optical laminated body comprising: a polarizing layer (21), a first transparent film (22) disposed closely to a front surface of the polarizing layer (21), and a second transparent film (23) disposed closely to a back surface of the polarizing layer (21), the polarizing layer (21) comprises a reflective polarizing film, and both of the first transparent film (22) and the second transparent film (23) are diffusive films.
